

TOURISM WANTS ACCESS TO RELIABLE INTERNET

One of the primary tourist requirements today is high-capacity, reliable internet – no matter how remote their chosen vacation destination is situated.

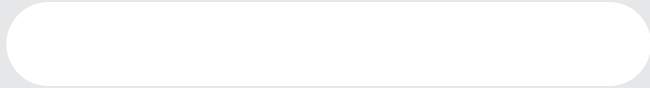

Just ask TripAdvisor, customers pick and choose their tourist establishments based on the amenities offered. Not being able to provide a reliable internet connection can be enough to make guests overlook your establishment and go to a competitor that can.

MorTourism is MorClick’s tourism and hospitality industry solution – designed to provide high-speed satellite internet to remote hospitality/tourism businesses, empowering them to benefit from the advantages of being geared up to optimise their guest experience and acquire a competitive edge.

ALSO AVAILABLE WITH VOICE OPTIONS.

- Wide-reaching coverage
- Products in varying speeds designed to suite your needs
- Support standard definition single user sessions
- Optimised to mitigate and limit weather fluctuations
- Local service and support
- Protects customers with a Fair Use Policy

FREQUENTLY ASKED QUESTIONS

WHO IS MORCLICK?

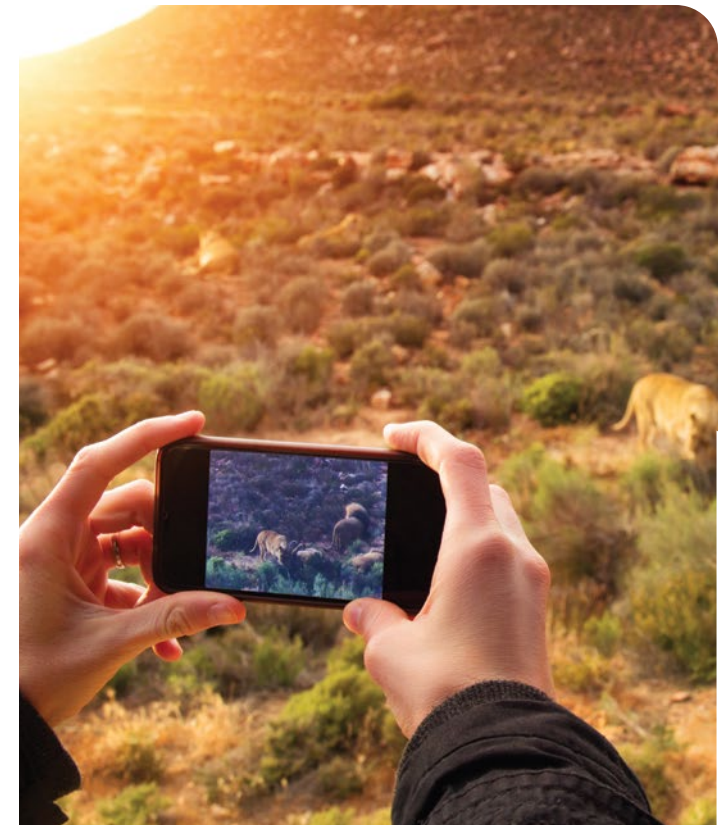

MorClick Satellite Internet Solutions is a South African Telecommunications Company, in partnership with YahClick (powered by Hughes), that offers cutting-edge broadband satellite services in South Africa. Our differentiator is that we deliver reliable, high-speed Internet connectivity to businesses and homes - partnering with your community to instantly connect you to the Internet via a small satellite dish and modem - from even the remotest places in South Africa.

MorClick offers different package options to suit your budget and needs.

INSTALLATION IS QUICK AND EASY.

We cover all the standard equipment costs, including modem, router and satellite dish when you subscribe with us.

**Travel costs may apply. Ts & Cs apply.*

HOW DOES IT WORK?

By linking two Unlimited 25/3 24-month Packages via a world-class aggregation tool, Peplink™ Balance 20 dual WAN router, MorTourism enables the combination of two lines into one usage point, doubling speed up to 50/6Mbps and ensuring that your guests have internet connectivity within the appropriate network environment.

We will arrange a network site survey to advise and quote on the network equipment and hardware required to get your establishment specified according to your requirements.

This will be invoiced separately and will require an upfront payment.

This package is also available with voice options.
